

All-Electric Homes

FLEXIBLE DESIGN

By eliminating flues and gas piping, all-electric homes have fewer design restrictions and better, tighter envelopes.

SAFE

All-electric homes eliminate CO and NOx exposure. Electric cooking technologies make the home safer.

AFFORDABLE

Efficient all-electric homes eliminate gas bills and first-time costs of trenching, connection, and gas piping.

All-Electric Home Benefits

SUSTAINABLE

Powered by renewable energy sources, all-electric homes produce less carbon and allow for the use of cleaner energy, such as solar, to offset energy bills.

CONVENIENT

Smart electric technology allows homeowners to easily control and reduce energy use in the home.

SIMPLE INSPECTIONS

Inspections take less time for sealed homes without flues and gas piping penetration.
